**5 Loans and advances to customers (continued)**

The primary factors that the Bank considers in determining whether a loan is impaired are its overdue status and reliability of related collateral, if any.

The Bank applied the portfolio provisioning methodology prescribed by IAS 39, Financial Instruments: Recognition and Measurement, and booked portfolio provisions for impairment losses that were incurred but have not been specifically identified with any individual loan at the end of the reporting period. The Bank's policy is to classify each loan as 'neither past due nor impaired' until specific objective evidence of impairment of the loan is identified. The impairment provisions may exceed the total gross amount of individually impaired loans as a result of this policy and the portfolio impairment methodology.

The fair value of collateral in respect of loans past due but not impaired and in respect of loans collectively and individually determined to be impaired at 31 March 2010 was as follows:

<i>(in millions of Russian Rubles)</i>	<b>Corporate loans – large</b>	<b>Corporate loans – medium</b>	<b>Corporate loans – small</b>	<b>Mortgage loans</b>	<b>Other loans to individuals</b>	<b>Total</b>

Neither past due nor impaired, but renegotiated loans represent the carrying amount of loans that would otherwise be past due or impaired whose terms have been renegotiated. Past due but not impaired loans represent collateralised loans where the discounted fair value of collateral covers the overdue interest and principal repayments. The amount reported as past due but not impaired is the whole balance of such loans, not only the individual instalments that are past due.

Inventories represent real estate assets, equipment, motor vehicles and inventory acquired by the Bank in settlement of overdue loans. The assets do not meet the definition of investment property and non-current assets held for sale and are classified as inventories in accordance with IAS 2, Inventories. The assets were initially recognised at cost when acquired. All of the above assets are expected to be realised within more than twelve months after the year-end. A decision on the use of the repossessed property is taken by the Bank's Management Board or the Board of Directors.

The Bank measures the investment property using the cost model less accumulated depreciation and provision for impairment, if necessary.

The portfolio of assets held for sale consists of residential and commercial real estate acquired by the Bank as repossessed collateral in the settlements of overdue loans. The Bank actively markets these assets and expects to dispose of these assets by December 2010.

## 16 Segment Analysis

Operating segment is a distinguishable component of the Bank that is engaged in providing products or services (business segment) with the purpose to generate income, whose operating results are regularly reviewed by the Bank's Management Board based on management accounts prepared in accordance with Russian accounting rules in terms of each operating segment. The functions of the chief operating decision maker (CODM) are performed by the Management Board of the Bank. Operating management and performance of an operating segment are the responsibility of the Deputy Chairman of the Management Board of the Bank supervising the corresponding business line.

Transactions between the operating segments are on normal commercial terms and conditions. Funds are ordinarily reallocated between operating segments, resulting in funding cost transfers disclosed in interest income and expense. Interest rates for these funds are differentiated depending on the attraction terms and are based on market indicators.

Segment assets and liabilities include operating assets and liabilities representing a major part of the Bank's assets and liabilities, as well as funds reallocated between operating segments, but excluding taxation. Internal charges and transfer pricing adjustments have been reflected in the performance of each operating segment. Segment performance is based on profitability and cost-effectiveness of operating assets.

The CODM evaluates performance of each segment based on profit before tax.

The table below represents the segment information of interest-bearing assets and interest-bearing liabilities per reportable segments for 3 months ended 31 March 2010 and 31 December 2009.

For the purpose of preparation of the management accounts the amount of assets and liabilities is calculated as average balances for the respective accounting period. Total assets and liabilities do not include the subsequent events.

**17 Financial Risk Management**

The risk management function within the Bank is carried out in respect of financial risks, operational risks and legal risks. Financial risk comprises market risk (including currency risk, interest rate risk and other price risk), credit risk, liquidity risk and geographical risk. The primary objectives of the financial risk management function are to establish risk limits, and then ensure that exposure to risks stays within these limits. The operational and legal risk management functions are intended to ensure proper functioning of internal policies and procedures to minimise operational and legal risks.

**Bank Vozrozhdenie****Notes to the interim Financial Statement according to IFRS as at March 31, 2010**

Policy and methods of financial risk management accepted by the Bank comply with the policy and methods described and applied in the Bank's annual financial report for the year ended December 31, 2009.

The tables below summarize the Bank's exposure to currency risk and Bank's liquidity position taking into account expected contractual time left before redemption of assets and liabilities.

**Currency risk.** The Bank is exposed to currency risk due to the fact that its assets and liabilities are denominated in different currencies as well as due to existence of open currency positions resulting from foreign currency transactions.

The table below summarises the Bank's exposure to currency risk at 31 March 2010:

<i>(in millions of Russian Rubles)</i>	<b>RR</b>	<b>USD</b>	<b>Euro</b>	<b>Other</b>	<b>Total</b>

**17 Financial Risk Management (continued)**

The above analysis includes only monetary assets and liabilities. Investments in equities and non-monetary assets are not considered to give rise to any material currency risk.

**Liquidity risk.** Liquidity risk is defined as the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Bank is exposed to daily calls on its available cash resources from overnight deposits, current accounts, maturing deposits, loan draw downs, guarantees and from margin and other calls on cash settled derivative instruments.

The analyses of Bank's liquidity risk as at March 31, 2010 is as follows:
